IoT Honeynet — Threat Intelligence Report

ALERT METADATA

Field	Value
Alert ID	`IDS-20260626-244121`
Severity	**HIGH**
Attack Type	sqli
Confidence	90%
Status	INVESTIGATING
Source IP	`127.0.0.1`
Destination Port	`8080`
Protocol	TCP
Connection State	`SF`
Timestamp	2026-06-26 17:16:52

EXECUTIVE SUMMARY

Suspicious traffic detected from 127.0.0.1 targeting port 8080. The request was flagged as sqli with 0 prior suspicious requests from this source. Honeypot engagement confirmed.

Attacker Intent: Attempting sqli against IoT gateway on port 8080.

KEY FINDINGS

- Path contains SQL keywords, likely a SQL injection attack
- Prior suspicious requests from this IP: 1

INDICATORS OF COMPROMISE (IOC)

Indicator	Value

Source IP	`127.0.0.1`
Source Port	`51786`
Destination Port	`8080`
Protocol	TCP
Connection State	`SF`
Packet Count	1

TECHNICAL ANALYSIS

Attack Classification

Technique: sqli

Severity Reasoning: Classified as high based on initial gateway AI assessment with 90% confidence.

Suspicious Indicators

- Path contains SQL keywords, likely a SQL injection attack
- Prior suspicious requests from this IP: 1

Baseline Deviation

This request is significantly more complex than typical IoT search queries.

RECOMMENDED ACTION

Block the source IP and investigate further for potential exploitation.
